VACCINES

Grippol® Plus (Influenza vaccine [inactivated] + Azoximer bromide)
- Grippol® Plus is a Russian inactivated inactivated polymer-subunit influenza vaccine, preservative-free. It is widely used in all population categories including risk groups, such as children aged 6 months, pregnant women, the elderly, children with chronic somatic disorders, allergic and immune deficiency conditions.
- Dosage forms: in pre-filled syringes and ampoules.

Grippol® Quadrivalent (Influenza vaccine [inactivated] + Azoximer bromide)
- Grippol® Quadrivalent is the first Russian quadrivalent inactivated subunit influenza vaccine to protect against 4 flu virus strains (i.e. 2 type A viruses (H1N1 and H3N2) and 2 lineages of influenza B virus (B/Yamagata and B/Victoria)). It is preservative-free, and is supplied in pre-filled syringes.

PHARMACEUTICALS

Polyoxidonium® (Azoximer bromide)
- An original product of complex action: immunomodulator, detoxifier, antioxidant. It is used for treatment of infectious diseases of bacterial, viral, or fungal origin, and is widely used in therapeutics, pediatrics, urology, gynecology, and urology.
- Dosage forms: lyophilizate, solution, tablets and suppositories.

Longidaza (Bovhyaluronidase azoximer)
- An advanced combined-effect enzyme for treatment of connective tissue hyperplasia conditions.
- Dosage forms: lyophilizate and suppositories.

It is preservative-free, and is supplied in pre-filled syringes.

Imoferaza®
- Complex product for prevention of women's iron deficiency. Contains: iron bisglycinate, vitamins C, B12 and B6, and highly bioavailable folic acid.
- Dosage form: powder sachet.

VitaFerr®
- Complex product for prevention of women's iron deficiency. Contains: iron bisglycinate, vitamins C, B12 and B6, and highly bioavailable folic acid.
- Dosage form: powder sachet.

DIETARY SUPPLEMENTS

Uronext®
- Cream for specialized treatment of scars.

BEAUTY PRODUCTS

Imoferaza®
- Cream for specialized treatment of scars.

Based on immobilized hyaluronidase enzyme.
The product portfolio

Includes its own original pharmaceutical products and vaccines, localized medicinal products, as well as generics and dietary supplements which are used in the relevant areas of medicine: infectious diseases, vaccinal prevention, immunology, therapeutics, pediatrics, urology, gynecology, reproductive health.

PHARMACEUTICALS

**Polyoxidonium®**

(Azoximer bromide)

An original product of complex action: immunomodulator, detoxifier, antioxidant. It is used for treatment of infectious diseases of bacterial, viral, or fungal origin, and is widely used in therapeutics, pediatrics, urology, gynecology, and urology.

Dosage forms: lyophilizate, solution, tablets and suppositories.

**Longidaza**

(Bovhyaluronidase azoximer)

An advanced combined-effect enzyme for treatment of connective tissue hyperplasia conditions.

Dosage forms: lyophilizate and suppositories.

VACCINES

**Grippol® Quadrivalent**

(Influenza vaccine [inactivated] + Azoximer bromide)

Grippol® Quadrivalent is the first Russian quadrivalent inactivated subunit influenza vaccine to protect against 4 flu virus strains (2 type A viruses (H1N1 and H3N2) and 2 lineages of influenza B virus (Yamagata and Victoria)). It is preservative-free, and is supplied in pre-filled syringes.

**Velson®**

(Melatonin)

A modern medication for human sleep normalization and human biorhythms establishment. Velson® regulates the sleep-wake cycle, promotes faster falling asleep, adaptation to jet lag and to changes in weather conditions in meteor-sensitive people.

Dosage form: film-coated tablets.

DIETARY SUPPLEMENTS

**Uronext®**

Complex product for protection from urinary tract infections. Formulated with D-mannose, CranMax (patented cranberry fruit concentrate) and vitamin D3. Dosage form: powder sachet.

**VitaFerr®**

Prevenar® 13 (Pneumococcal polysaccharide conjugate vaccine (13-valent, adsorbed))

Prevenar® 13 is a vaccine used for prevention of pneumococcal infections caused by Streptococcus pneumoniae, serotypes 1, 3, 4, 5, 6A, 6B, 7F, 9V, 14, 18C, 19A, 19F, and 23F, such as sepsis, bacteremia, meningitis, pneumonia, and acute otitis media. It may be used in subjects aged 2+ months and older without any age restrictions. The vaccine is produced by Petrovax as a full-cycle manufacturing of the finished dosage form in cooperation with Pfizer.

Actilyse® (Alteplase)

Actilyse® is a biotechnological thrombolytic agent used to treat both myocardial infarction and ischemic stroke. It is primary advantage, and a unique evidence-based indication. Alteplase is the only thrombolytic medication indicated for treating patients with ischemic stroke within 4.5 hours after the onset of the symptoms. It is manufactured by Petrovax in cooperation with Boehringer Ingelheim.

Metalyse® (Tenecteplase)

Metalyse® is an innovative thrombolytic agent for the treatment of myocardial infarction. It is the only recommended single-injection (for 5-10 seconds), bolus-dose thrombolytic drug on the market for immediate medical care in patients with acute myocardial infarction within the shortest time possible in the emergency care setting. Currently, tenecteplase is one of the most thoroughly studied thrombolytics worldwide. It is manufactured by Petrovax in cooperation with Boehringer Ingelheim.

Full-cycle biopharmaceutical company

25 years of successful operation in the pharmaceutical market.

700 It has more than 700 employees.

160 Manufacturer capacities allow the annual production of 160 million dosages of immunobiologics.

12 The company exports products to 12 countries, including the EAEU, the Middle East and the EU. Petrovax is the largest Russian exporter of medicinal products.

More than 100 patents for molecules and pharmaceutical manufacturing technologies.

25+ It has over 25+ years of successful operation in the pharmaceutical market.
