 Petrovax

Petrovax is a Russian full-cycle biopharmaceutical company

25
years

25 years of successful operation in the pharmaceutical market.

20+
patents

More than **20 patents** for molecules and pharmaceutical manufacturing technologies.

5
TOP

Among the **TOP-5** immunobiological pharmaceutical manufacturers in Russia.

800+
employees

Petrovax personnel — over **800 employees**.

160
million doses

Manufacturing capacities — **160 million dosages** of immunobiologicals a year.

12
countries

Export to **12 countries**. The largest Russian exporter of medicinal products.

Mission company:
**Innovative products
for treatment, prevention
and better quality of life**

The company is part of the Interros Group

The product portfolio

The product portfolio includes its own original pharmaceutical products and vaccines, localized medicinal products, as well as generics and dietary supplements.

The company's products are used in the relevant areas of medicine: infectious diseases, immunology, vaccinal prevention, therapeutics, pediatrics, urology, gynecology, reproductive health.

VACCINES

Grippol® Plus

(Influenza vaccine [inactivated] + Azoximer bromide)

Grippol® Plus is a Russian trivalent inactivated polymer-subunit influenza vaccine, preservative-free. It is widely used in all population categories including risk groups, such as children aged 6+ months, pregnant women, the elderly, subjects with chronic somatic disorders, allergies, and immune deficiency conditions.

Dosage forms: pre-filled syringes and ampoules.

Grippol® Quadrivalent

(Influenza vaccine [inactivated] + Azoximer bromide)

Grippol® Quadrivalent is the first Russian quadrivalent inactivated subunit influenza vaccine to protect against 4 flu virus strains i.e. 2 type A viruses (H1N1 and H3N2) and 2 lineages of influenza B virus (B / Yamagata+B / Victoria). It is preservative-free.

Dosage form: pre-filled syringes.

The product portfolio

PHARMACEUTICALS

Polyoxidonium®

(Azoximer bromide)

An original product of complex action: immunomodulator, detoxifier, antioxidant. It is used for treatment of infectious diseases of bacterial, viral, or fungal origin, and is widely used in therapeutics, pediatrics, gynecology, and urology. Dosage forms: lyophilizate, solution, tablets and suppositories.

Longidaza®

(Bovhyarulonidase azoximer)

An advanced combined-effect enzyme for treatment of connective tissue hyperplasia conditions. Dosage forms: lyophilizate and suppositories.

Velson®

(Melatonin)

A modern medication for human sleep normalization and human biorhythms establishment. Velson® regulates the sleep-wake cycle, promotes faster falling asleep, adaptation to jet lag and to changes in weather conditions in meteo-sensitive people. Dosage form: film-coated tablets.

Prevenar® 13

(Pneumococcal polysaccharide conjugate vaccine (13-valent, adsorbed))

Prevenar® 13 is a vaccine used for prevention of pneumococcal infections caused by *Streptococcus pneumoniae*, serotypes 1, 3, 4, 5, 6A, 6B, 7F, 9V, 14, 18C, 19A, 19F, and 23F, such as sepsis, bacteremia, meningitis, pneumonia, and acute otitis media. It may be used in subjects aged 2+ months and older without any age restrictions. The vaccine is produced by Petrovax as a full-cycle manufacturing of the finished dosage form in cooperation with Pfizer.

Metalyse®

(Tenecteplase)

Metalyse® is an innovative thrombolytic agent for the treatment of myocardial infarction. It is the only recommended single-injection (for 5-10 seconds), bolus-dose thrombolytic drug in the world to be used for immediate medical care in patients with acute myocardial infarction within the shortest time possible in the emergency care setting. Currently, tenecteplase is one of the most thoroughly studied thrombolytics worldwide. It is manufactured by Petrovax in cooperation with Boehringer Ingelheim.

Actilyse®

(Alteplase)

Actilyse® is a biotechnological thrombolytic agent used to treat both myocardial infarction and ischemic stroke (it is the primary advantage and a unique evidence-based indication). Alteplase is the only thrombolytic medication indicated for treating patients with ischemic stroke within 4.5 hours after the onset of the symptoms. It is manufactured by Petrovax in cooperation with Boehringer Ingelheim.

The product portfolio

DIETARY SUPPLEMENTS

Uronext®

A complex product for protection from urinary tract infections. Formula with D-mannose, Cran-Max (patented cranberry fruit concentrate) and Vitamin D₃. Dosage form: powder sachet.

Gialera®

A unique combination of sodium alginate and hyaluronic acid, providing a comprehensive approach to manage heartburn. Formula: sodium alginate, hyaluronic acid. Dosage form: stick packets.

ARTNEO®

A unique five-component complex to maintain healthy joints and spine. Formula: native (undenatured) type II collagen, boswellic acids, methylsulfonylmethane (MCM), vitamin C, vitamin D₃. Dosage form: capsules.

VitaFerr®

A complex product for prevention of women's iron deficiency. Contains: iron bisglycinate, vitamins C, B₆, B₁₂ and a highly bioavailable folate.
Dosage form: capsules.

Whiteline: Ca+D₃+K₂

A specially formulated blend of calcium and vitamins D₃ and K₂ to maintain the calcium balance within the body. Formula: calcium, vitamin D₃, vitamin K₂.
Dosage form: tablets.

BEAUTY PRODUCTS

Imoferaza®

Cream for specialized treatment of scars.
Based on immobilized hyaluronidase enzyme.
